

Task 1: Run uname -a

- Open the Terminal and type:
 - `uname -a`

The screenshot shows a terminal window titled 'redhat - VMware Workstation'. The terminal prompt is 'root@localhost:~'. The command 'uname -a' has been executed, and the output is displayed on the next line: 'Linux localhost.localdomain 5.14.0-687.20.1.el9_8.x86_64 #1 SMP PREEMPT_DYNAMIC Sun Jun 28 21:16:58 EDT 2026 x86_64 x86_64 x86_64 GNU/Linux'. The terminal window has a dark background and a light-colored text. The VMware Workstation interface is visible in the background, showing the 'redhat' window and the 'Terminal' tab.

Task 2: Differences Between Ubuntu, Debian, and CentOS/RHEL

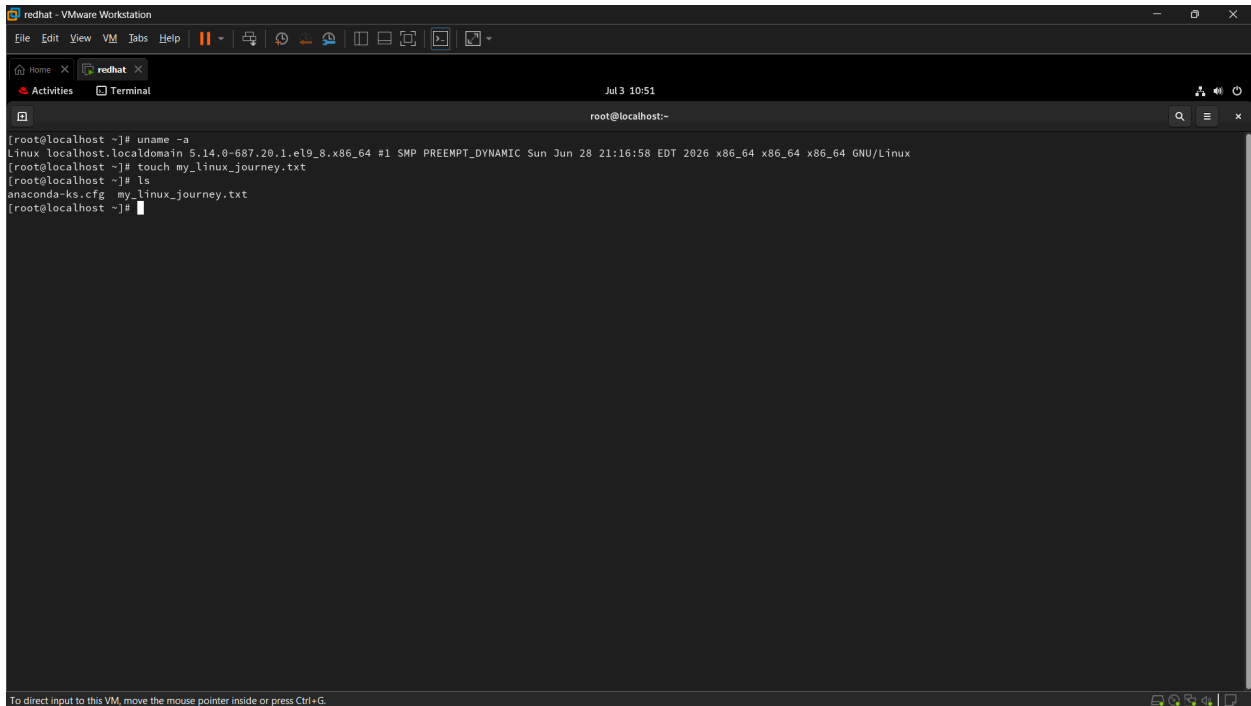

Feature	Ubuntu	Debian	CentOS / RHEL
Package Manager	APT (.deb packages)	APT (.deb packages)	YUM/DNF (.rpm packages)
Default Desktop	GNOME	GNOME (can use KDE/XFCE)	GNOME
Typical Use	Desktop, beginners, developers	Stable servers and desktops	Enterprise servers, businesses

Task 3: CLI vs GUI

Using CLI

- Open Terminal:

- touch my_linux_journey.txt
- Verify:
 - ls

```
redhat - VMware Workstation
File Edit View VM Tabs Help
[redhat]
Activities Terminal Jul 3 10:51 root@localhost:~
[root@localhost ~]# uname -a
Linux localhost.localdomain 5.14.0-687.20.1.el9_8.x86_64 #1 SMP PREEMPT_DYNAMIC Sun Jun 28 21:16:58 EDT 2026 x86_64 x86_64 x86_64 GNU/Linux
[root@localhost ~]# touch my_linux_journey.txt
[root@localhost ~]# ls
anaconda-ks.cfg  my_linux_journey.txt
[root@localhost ~]#
```

Using GUI

- Open Files.
- Right-click in your Home folder.
- Select New Document (or New File).
- Name it:
 - my_linux_journey.txt

Task 4: Short Guide

Learning the Linux Command Line Interface (CLI) makes managing a computer much faster and more powerful. It allows you to install software, organize files, and troubleshoot problems quickly using simple commands. Many servers and cloud systems use Linux without a graphical interface, so CLI skills are valuable for IT professionals. Even if you normally use GUI apps like Spotify or Zomato on your phone, learning CLI helps you understand how computers work behind the scenes and improves your technical skills.
