

Task 1: Connect to a remote server and create music-downloads

Connect using SSH

- `ssh user@192.168.1.100`

Create the directory

- `mkdir -p ~/music_downloads`

Verify:

- `ls`

Task 2: Transfer playlist.txt using SCP

Command:

- `scp playlist.txt user@192.168.1.100:~/music_downloads/`

Verify on the remote server:

- `ls ~/music_downloads`

Task 3: Configure Passwordless SSH Login

Steps:

1. Generate SSH Key
 - `ssh-keygen`
2. Copy Public Key
 - `ssh-copy-id user@192.168.1.100`
3. Test Passwordless Login
 - `ssh user@192.168.1.100`
4. Bash Script to Restart Nginx
 - Create the file:
 - `nano remote_nginx_check.sh`
`#!/bin/bash`
`REMOTE_USER="user"`
`REMOTE_HOST="192.168.1.100"`
`ssh ${REMOTE_USER}@${REMOTE_HOST} << EOF`
`sudo systemctl restart nginx`
`sudo systemctl status nginx --no-pager`
`EOF`
 - Make it executable:
 - `chmod +x remote_nginx_check.sh`

- Run it:
 - `./remote_nginx_check.sh`

Task 5: Correct the SSH Command

- Incorrect command:
 - `ssh user@192.168.1.100:/home/user/music_downloads`
- Correct command:
 - `ssh user@192.168.1.100`
- If you want to go directly to the directory after login:
 - `ssh user@192.168.1.100`
 - `cd /home/user/music_downloads`
