

## Task 1: Install NFS Server and Create Shared Directory

Install NFS package

- `sudo dnf install -y nfs-utils`

Enable and start NFS service

- `sudo systemctl enable --now nfs-server`

Check service status:

- `sudo systemctl status nfs-server`

Create the shared directory

- `sudo mkdir -p /srv/music_share`

Set permissions

- `sudo chmod 777 /srv/music_share`

Verify:

- `ls -ld /srv/music_share`

## Task 2: Configure /etc/exports

Open the exports file:

- `sudo nano /etc/exports`

Add the following line

- `/srv/music_share 192.168.1.20(rw,sync,no_root_squash)`

Export the shared directory:

- `sudo exportfs -rav`

Restart the NFS service:

- `sudo systemctl restart nfs-server`

Verify exported shares:

- `sudo exportfs -v`

Allow NFS through the firewall:

- `sudo firewall-cmd --permanent --add-service=nfs`
- `sudo firewall-cmd --reload`

## Task 3: Mount the NFS Share on the Client

Install NFS utilities on the client:

- `sudo dnf install -y nfs-utils`

Create the mount point:

- `sudo mkdir -p /mnt/playlist`

Mount the shared folder:

- `sudo mount 192.168.1.10:/srv/music_share /mnt/playlist`

Verify:

- `df -h`

Create a test file:

- `touch /mnt/playlist/test.txt`

Verify:

- `ls /mnt/playlist`

## Task 4: Create restaurant\_menus Folder and Copy Files

Create the folder:

- `mkdir /srv/music_share/restaurant_menus`

Copy two PDF or image files:

- `cp image1.jpg /srv/music_share/restaurant_menus/`
- `cp image2.png /srv/music_share/restaurant_menus/`

On the client:

- `ls /mnt/playlist/restaurant_menus`

## Task 5: Change the Share to Read-Only

Unmount the share on the client:

- `sudo umount /mnt/playlist`

Edit the exports file:

- `sudo nano /etc/exports`

Change:

- `/srv/music_share 192.168.1.20(rw, sync, no_root_squash)`

to

- `/srv/music_share 192.168.1.20(ro, sync, no_root_squash)`

Apply the changes:

- `sudo exportfs -rav`

Restart NFS:

- `sudo systemctl restart nfs-server`

Mount again on the client:

- `sudo mount 192.168.1.10:/srv/music_share /mnt/playlist`

Try creating a file:

- `touch /mnt/playlist/newfile.txt`
